**Thank you for purchasing and downloading one of my zines!**

**It truly means a lot to me. These little booklets are handmade labors of love, and every reader, printer, and page-folder out there is part of what keeps them alive. I hope this one brings you a spark of joy, a moment of curiosity, or maybe even a chuckle.**

**If you'd like to print your own copy, here's how:**

### **How to Print My Zine**

**This zine is formatted for easy at-home printing on standard US Letter paper (8.5" × 11"). To get the best results:**

---

#### **What You'll Need:**

- Letter-sized paper (8.5" × 11")
- A printer that supports double-sided printing
- (Optional) Long-arm stapler and paper trimmer

---

#### **Print Settings:**

- **Print on both sides**
- **Flip on the short edge**
- **Scale:** 100% or "Actual Size"
- **Orientation:** Landscape
- **Pages to print:** All
- **Set it to flip on the short edge**

<https://studiosecondstreet.com>

If printing manually:

- Print **odd pages first**, then reinsert and print **even pages**, flipping on the short edge.

---

### **Assembly:**

1. Fold the sheets in half to form a booklet. Look at the page numbers to figure out which way to fold. Note that the cover and Page 2 should be on the *outside* of the fold (meaning that, when the page is folded correctly, you will see them on the outside). Follow this pattern if there are more than 2 pages to fold.
2. When all the pages are folded, assemble in order, placing the Page 2 folded paper inside the Cover folded paper, etc. For most zines, there are only two folded papers.
3. Staple along the center fold (optional)
4. Trim edges if desired
5. Enjoy!
